CONCLUSION

INTRODUCTION

Our lives are enriched and imbued with a greater sense of meaning when they are spent in the company of others.

Humans are naturally social beings and long for companionship and friendship throughout their lives.

This necessary human contact can, and does, take many forms. Most people, however, find that the most enriching relationships are of a romantic variety.

Almost everyone is looking, or has found, the “right person” for them. Couples meet in a variety of ways under an infinite variety of circumstances. Every couple, they say, has a great love story to tell.

This ebook is designed for those who are waiting to find their story. It is a guide to keeping and finding that special person with whom you can share your joys, sorrows, fears, expectations and desires.

We can’t promise that reading this guide will lead to a white wedding in a few months. We can’t guarantee you that a perusal of these materials will suddenly land you Mr. or Ms. Right.

Love is a tricky thing. It can be unpredictable and people often find it in places and circumstances where it is least expected.

Despite that seeming randomness, however, there are basic ideas and principles that will increase the likelihood of developing, maintaining, and growing a great relationship. This ebook focuses upon those notions.

This guide to discovering the love of your life and developing the relationship for which you have longed is not a superficial “guide to dating” or one of those snake oil coated manuals for hypnotizing the guy or gal of your dreams.

Instead, it is a fair and honest look at what makes relationships--and at what makes them work.

We haven't written this from a "male" or "female" perspective. The approach is balanced with no favor being shown to traditional masculine or feminine gender roles.

The actions and thought process that produce and nurture quality relationships aren't bound by such labels and are universal human qualities.

Unlike many "guides to romance," you will find Happily Ever After to be a pretty "family friendly" read.

Obviously, there is an intimate component to romantic relationships and, from time to time, we do address those aspects of forging a lasting partnership.

However, we've attempted to address those issues in a respectful and non-exploitative manner.

This ebook is written with everyone in mind. Although the language used in this guide does tend to have a somewhat heterosexual bent, the principles outlined within it are applicable to those of any sexual orientation.

Religion invariably plays a role in romantic relationships, as well. Again, Happily Ever After is written for everyone. It's offered without religious commentary and the perspectives provided are not grounded in any one particular faith.

The lessons and guidance offered by this ebook should be applicable to almost all readers.

Finding a mate and maintaining that relationship can be a great challenge. It does, however, offer the most amazing rewards imaginable. Happily Ever After should provide you with some valuable insight on how to attain those wonderful rewards.

Happily Ever After

FINDING THE RIGHT PERSON

Love is Bound to Follow Once You Put Yourself First

*When you really want love you will find it waiting for you.
~Oscar Wilde*

One mistake that many women and men make when it comes to love is losing sight of what is best for them. They put the other person's needs and desires before their own.

Although this can be fulfilling in a very unselfish way, it can also lead to countless problems in the future. Therefore, it's always a good idea to put yourself first before you even begin to think about love.

This can be hard to understand if you hold the belief that you need another person's love and acceptance to feel whole.

Although it's always enriching to be surrounded by people we care for, you will find much more happiness if you begin any relationship with your needs fulfilled from within.

There are a few important things that every person can do that will help ensure that they are living a healthy and balanced life.

This in turn will translate into a more satisfying and complete relationship with another person.

Ways to take care of your needs include:

Stay healthy. If you live alone you might be prone to hitting the fast food outlet on the way home from work or choosing a frozen dinner that pops in the microwave.

Although these are certainly convenient choices, why not plan ahead and choose healthier alternatives. There isn't that much work involved in preparing a big Greek salad or a grilled piece of chicken.

Working out can also be seen as a burden, but a brisk walk in the park or some time at the gym will not only keep your muscles toned but it will keep your thoughts clear as well.

Pursue an enjoyable career. Even if you are a woman who has always had her heart set on being a stay at home mom, dive into a career path that you love.

Everyone has something they love doing on a professional basis, so always keep that in clear view. Standing on your own two feet financially will help you feel more stable in every part of your life.

Take up a fun hobby. If you like high places why not consider exploring the world of rock climbing or sky diving? If you are an avid reader, join a local book club.

Making time to enjoy pastimes that you love will keep you more balanced.

Don't lose touch with family and friends. Life gets busy and all too often we lose touch with the people we are closest to.

Make time to meet family members or close friends for lunch or dinner. Take in a movie or go for a bike ride. These people are important and as such you need to remember to stay involved in their lives.

When a person feels happy and fulfilled in their life it becomes much easier to love another.

When you show yourself love and respect, others will want to do the same. You also won't be looking to the other person for fulfillment instead they will simply be adding something very positive to your already wonderful life.

Five Great Places to Meet Quality Singles

*Falling in love consists merely in uncorking the
imagination and bottling the common sense.*
Helen Rowland

Most people can recall a time when they were walking by themselves, perhaps in a mall or down a crowded sidewalk, and saw a happy couple hand in hand, happily in love. Or, if you've been an unattached person at a wedding, you have probably asked yourself when it will be your turn to find love and happiness.

Finding a person to love, who loves you back, can be difficult in a time when people are on edge, distrusting, and unwilling to put themselves in a vulnerable position.

Each and every one of us is looking for something different, which is why even if you're happily-married neighbors met online, you may not be interested in a relationship that blooms over the internet. Listed here are seven places you can consider when looking for compatible singles in your area.

There are a variety of options here, and in no particular order, these are the most popular places that you can meet a quality single – meaning, no bars!

Church – Many people are looking to meet singles with the same religious affiliation and beliefs as themselves, and what better place to do this than at church?

Most churches offer ample opportunities to mingle and get to know others, including weekend retreats, weekly Bible study courses, and activities such as choir. Many churches even offer a weekly or monthly singles night.

School – Not all college students are ready for a serious and steady relationship. However, students of all ages are looking for love too, so it is not unreasonable to think that there are others who have more on their mind than their mid-term finals.

College clubs and organizations are great places to meet others who have the same interests as you, so consider joining a group or two in your spare time.

Work – Many workplaces have policies against dating co-workers, though most only apply to those in a managerial or superior position. Regardless, we can't always choose who we love, and you just may find yourself in the awkward position of falling for someone you spend time with every day.

Dating Services – These include internet services such as Harmony.com and Match.com, and newspaper classifieds. A new trend in dating is Speed Dating, where up to a hundred singles meet at a restaurant and spend about 8 minutes with up to 8 different people.

Opportunities to meet others at the event are possible during the intermission and after the 64 minutes of dating has passed, at which time there is an “open” mingling session.

This format takes pressure off individuals, as no personal information is given out. When participants go home, they enter their favorite “dates” into their online profile, and when two individuals enter each others' information, a “match” is created and at that point their personal contact information is shared with each other.

Groups and Organizations – Other popular places to meet individuals include at your local Bingo night, community fairs and carnivals, professional groups such as Rotary, and clubs that focus on hobbies and even heritage backgrounds.

There are many singles out there looking for love, just like you! I know it is hard to believe that there is a person out there just for you, but there is.

You just have to know where to look and remember always to keep your eyes open, because often love is standing right in front of us.

You Only have the right to read and enjoy this ebook for personal use only
