HOW TO USE THIS MANUAL

This service manual describes the service procedures for the $\ensuremath{\mathsf{CBR600RR}}$.

Follow the Maintenance Schedule (Section 4) recommendations to ensure that the vehicle is in peak operating condition and the emission levels are within the standards set by the U.S. Environmental Protection Agency (EPA) and California Air Resources Board (CARB) and Transport Canada.

Performing the first scheduled maintenance is very important. It compensates for the initial wear that occurs during the break-in period.

Sections 1 and 4 apply to the whole motorcycle. Section 3 illustrates procedures for removal/installation of components that may be required to perform service described in the following sections. Section 5 through 20 describe parts of the motorcycle, grouped according to location.

Find the section you want on this page, then turn to the table of contents on the first page of the section.

Most sections start with an assembly or system illustration, service information and troubleshooting for the section. The subsequent pages give detailed procedure.

If you are not familiar with this motorcycle, read Technical Features in Section 2.

If you don't know the source of the trouble, go to section 22 Troubleshooting.

Your safety, and the safety of others, is very important. To help you make informed decisions we have provided safety messages and other information throughout this manual. Of course, it is not practical or possible to warn you about all the hazards associated with servicing this vehicle.

You must use your own good judgement.

You will find important safety information in a variety of forms including:

· Safety Labels - on the vehicle

These signal words mean:

ADANGER

You WILL be KILLED or SERIOUSLY HURT if you don't follow instructions.

AWARNING

You CAN be KILLED or SERIOUSLY HURT if you don't follow instructions.

ACAUTION

You CAN be HURT if you don't follow instructions.

Instructions – how to service this vehicle correctly and safely.

As you read this manual, you will find information that is preceded by a NOTICE symbol. The purpose of this message is to help prevent damage to your vehicle, other property, or the environment.

SYMBOLS

The symbols used throughout this manual show specific service procedures. If supplementary information is required pertaining to these symbols, it would be explained specifically in the text without the use of the symbols.

	Replace the part (s) with new one (s) before assembly.
	Use recommended engine oil, unless otherwise specified.
No of	Use molybdenum oil solution (mixture of the engine oil and molybdenum grease in a ratio of 1:1).
GREASE	Use multi-purpose grease (Lithium based multi-purpose grease NLGI #2 or equivalent).
	Use molybdenum disulfide grease (containing more than 3% molybdenum disulfide, NLGI #2 c equivalent).
- TOM MA	Example: Molykote® BR-2 plus manufactured by Dow Corning U.S.A.
	Multi-purpose M-2 manufactured by Mitsubishi Oil, Japan
	Use molybdenum disulfide paste (containing more than 40% molybdenum disulfide, NLGI #2 c equivalent).
	Example: Molykote® G-n Paste manufactured by Dow Corning U.S.A.
MPH	Honda Moly 60 (U.S.A. only)
	Rocol ASP manufactured by Rocol Limited, U.K.
	Rocol Paste manufactured by Sumico Lubricant, Japan
5 SH	Use silicone grease.
LOCK	Apply locking agent. Use a middle strength locking agent unless otherwise specified.
SEALL	Apply sealant.
BRAKE	Use DOT 4 brake fluid. Use the recommended brake fluid unless otherwise specified.
FORK	Use Fork or Suspension Fluid.

SERVICE RULES

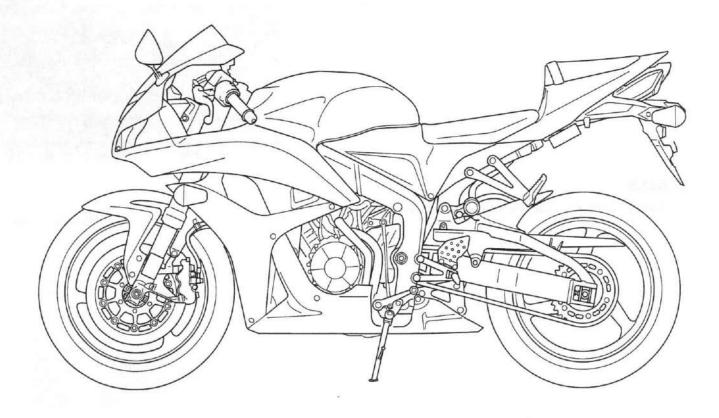

- Use genuine Honda or Honda-recommended parts and lubricants or their equivalents. Parts that don't meet Honda's design specifications may cause damage to the motorcycle.
- 2. Use the special tools designed for this product to avoid damage and incorrect assembly.
- 3. Use only metric tools when servicing the motorcycle. Metric bolts, nuts and screws are not interchangeable with English fasteners.
- 4. Install new gaskets, O-rings, cotter pins, and lock plates when reassembling.
- 5. When tightening bolts or nuts, begin with the larger diameter or inner bolt first. Then tighten to the specified torque diagonally in incremental steps unless a particular sequence is specified.
- 6. Clean parts in cleaning solvent upon disassembly. Lubricate any sliding surfaces before reassembly.
- 7. After reassembly, check all parts for proper installation and operation.
- 8. Route all electrical wires as shown in the Cable and Harness Routing (page 1-21).

ABBREVIATION

Throughout this manual, the following abbreviations are used to identify the respective parts or systems.

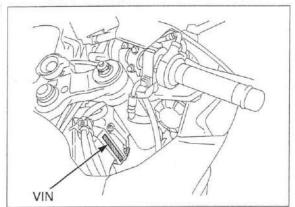

Abbrev. term	Full term	
CKP sensor	Crankshaft Position sensor	
CMP sensor	Camshaft Position sensor	
DLC	Data Link Connector	
DTC	Diagnostic Trouble Code	
ECM	Engine Control Module

EGCV	Exhaust Gas Control Valve	
EGCV POT	Exhaust Gas Control Valve Potentiometer	
EOP switch	Engine Oil Pressure switch	
EVAP	Evaporative Emission	
HDS	Honda Diagnostic System	
HESD	Honda Electronic Steering Damper	
IACV	Idle Air Control Valve	
AT sensor	Intake Air Temperature sensor	
MAP sensor	Manifold Absolute Pressure sensor	
MIL	Malfunction Indicator Lamp	
PAIR	Pulsed Secondary Air Injection	
PGM-FI	Programmed Fuel Injection	
SCS connector	Service Check Short connector	
TP sensor	Throttle Position sensor	
VS sensor	Vehicle Speed sensor	

MODEL IDENTIFICATION

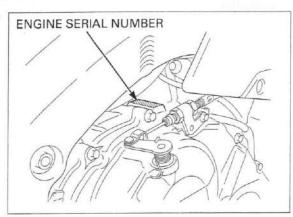

SERIAL NUMBERS

The Vehicle Identification Number (VIN) is stamped on the right side of the steering head.

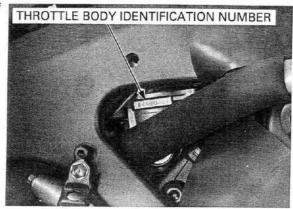

The engine serial number is stamped on the upper side of the crankcase as shown.

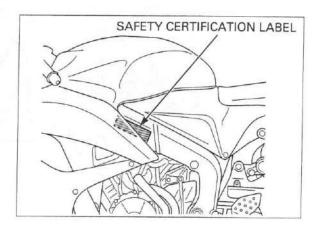

GENERAL INFORMATION

The throttle body identification number is stamped on the right side of the throttle body as shown.

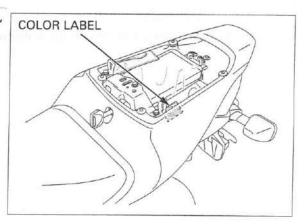

LABELS

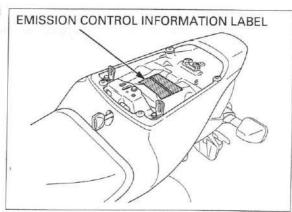

The Safety Certification Label is located on left side of the frame.

The color label is attached as shown. When ordering color-coded parts, always specify the designated color code.

The Emission Control Information Label is located on the rear fender B as shown.
